

VLA Science Principles

At VLA we believe
that science is
good when:

- ❖ Children have opportunities to investigate and test their own ideas.
- ❖ Lessons include meaningful and memorable learning experiences to deepen children's understanding.
- ❖ Children are encouraged to be inquisitive, independent thinkers who can ask their own questions.
- ❖ Children have opportunities to access real, hands on, practical experiences that relate to everyday life.
- ❖ Staff and children use and understand scientific language
 - ❖ Children are confident to share ideas, make predictions and explain their findings.
